20 questions to ask your mother: Women's Health for Life Donnica Moore, 2009-01-06 Women need their own health reference source. Research into gender-specific medicine — particularly identifying the ways in which diseases and their treatment affect men and women differently — has gained ground in the past 25 years. While this information is familiar to the medical community, much of it is unknown to the layperson. For example, more women than men die of cardiovascular disease every year, possibly because their symptoms are not recognized. Organized by body system, each chapter starts out with an explanation of how that system works and ways to maintain healthy function through diet, exercise, and other self-help measures. This is followed by an explanation of some of the medical conditions affecting that particular system and how they should be treated — in women, not men. Highly regarded as a women's health expert and advocate; as a physician educator and as a media commentator, Dr. Moore is the Founder and President of DrDonnica.com, a popular women's health information website launched in Sept. 2000. She is also Founder and President of Sapphire Women's Health Group LLC, a multimedia women's health education and communications firm. Team-written by female specialists in the US and UK, all of whom are experts in their respective fields.

20 questions to ask your mother: Mothers on the Margin E Anne Clements, 2014-08-28 The Gospel of Matthew opens with a patrilineal genealogy of Jesus that intriguingly includes five women: Tamar, Rahab, Ruth, 'she of Uriah', and Mary. In a gospel that has a strongly Jewish and male-orientated outlook, why are women incorporated? Particularly, why include these four Old Testament women alongside Mary? Rejecting traditional as well as feminist views, E. Anne Clements undertakes a close literary reading of the narratives to discern how each woman is characterised and presented. All are significant scriptural figures on the margins of Israelite society. From this intertextual world established by Matthew, Clements explores why Matthew may have named these women in the opening genealogy and what implications their inclusion may have for the ongoing gospel narrative. Mothers on the Margin? argues that Matthew's Gospel contains a counter narrative focused on women. The presence of the five women in the genealogy indicates that the birth of the Messiah will bring about a crisis in Israel's identity in terms of ethnicity, marginality, and gender. The women signal that Matthew's Gospel is concerned with the construal of a new identity for the people of God.
