MFT is an intensive method involving a small group of families working together towards recovery. Building on previous work that focuses on mobilising family resources as a major factor in therapeutic change, MFT introduces a new element: encouraging groups of families to work together to rediscover their strengths, overcome feelings of isolation, and find renewed hope. The authors describe how MFT works and how it can enhance the treatment of eating disorders by improving service delivery and reducing costs. Eighteen families serve as the 'voice of experience,' their stories breathing life into the science. The families provide a long-term perspective and reflection on their MFT participation. Their stories emphasise the importance of early intervention, family involvement, and collaboration in overcoming anorexia. Strategies for family members, friends, and professionals illustrate the evidence base for this model of care. This book, offering an accessible guide to MFT, has international appeal for families of children with eating disorders, health professionals, and healthcare providers.
