beyond the law 2019 cast: Absent Interests: On the Abstraction of Human and Animal Milks Sarah Czerny, 2022-10-17 How does milk become cow milk, donkey milk or human milk? When one closely explores this question, the species difference between milks is not as stable as one

might initially assume, even if one takes an embodied perspective. To show this, this book takes readers through an ethnographic comparison of milk consumption and production in Croatia in a range of different social settings: on farms, in mother-infant breastfeeding relations, in food hygiene documentation and in the local landscape. It argues that humans actually invest considerable work into abstracting and negotiating milks into their human and animal forms.

beyond the law 2019 cast: The Queer Outside in Law Senthoran Raj, Peter Dunne, 2020-11-30 This book contributes to current debates about “queer outsides” and “queer outsiders” that emerge from tensions in legal reforms aimed at improving the lives of lesbian, gay, bisexual, transgender, intersex, and queer people in the United Kingdom. LGBTIQ people in the UK have moved from being situated as “outlaws” – through prohibitions on homosexuality or cross-dressing – to respectable “in laws” – through the emerging acceptance of same-sex families and self-identified genders. From the partial decriminalisation of homosexuality in the Sexual Offences Act 1967, to the provision of a bureaucratic mechanism to amend legal sex in the Gender Recognition Act 2004, bringing LGBTIQ people “inside” the law has prompted enormous activist and academic commentary on the desirability of inclusion-focused legal and social reforms. Canvassing an array of current socio-legal debates on colonialism, refugee law, legal gender recognition, intersex autonomy and transgender equality, the contributing authors explore “queer outsiders” who remain beyond the law’s reach and outline the ways in which these outsiders might seek to “come within” and/or “stay outside” law. Given its scope, this modern work will appeal to legal scholars, lawyers, and activists with an interest in gender, sex, sexuality, race, migration and human rights law.

beyond the law 2019 cast: Selfless Intervention Cedric Ryngaert, 2020-06-19 Should states intervene in situations outside of their own territory in order to safeguard or promote the common good? In this book, Cedric Ryngaert addresses this key question, looking at how the international law of state jurisdiction can be harnessed to serve interests common to the international community. The author inquires how the purpose of the law of jurisdiction may shift from protecting national interests to furthering international concerns, such as those relating to the global environment and human rights. Such a shift is enabled by the instability of the notion of jurisdiction, as well as the interpretative ambiguity of the related notions of sovereignty and territoriality. There is no denying that, in the real world, 'selfless intervention' by states tends to combine with more insular considerations. This book argues, however, that such considerations do not necessarily detract from the legitimacy of unilateralism, but may precisely serve to trigger the exercise of jurisdiction in the common interest.

beyond the law 2019 cast: *Contingency in International Law* Ingo Venzke, Kevin Jon Heller, 2021-04-22 This book poses a question that is deceptive in its simplicity: could international law have been otherwise? Today, there is hardly a serious account left that would consider the path of international law to be necessary, and that would refute the possibility of a different law altogether. But behind every possibility of the past stands a reason why the law developed as it did. Only with a keen sense of why things turned out the way they did is it possible to argue about how the law could plausibly have turned out differently. The search for contingency in international law is often motivated, as it is in this volume, by a refusal to resign to the present state of affairs. By recovering past possibilities, this volume aims to inform projects of transformative legal change for the future. The book situates that search for contingency theoretically and carries it into practice across many fields, with chapters discussing human rights and armed conflict, migrants and refugees, the sea and natural resources, foreign investments and trade. In doing so, it shows how politically charged questions about contingency have always been.

beyond the law 2019 cast: *Beyond Law and Development* Sam Adelman, Abdul Paliwala, 2022-04-27 The book highlights new imaginaries required to transcend traditional approaches to law and development. New imaginaries emphasise deconstruction of fashionable myths of law, development, human rights, governance and post-coloniality to focus on communal and feminist relationality, non-western legal systems, personal responsibility for justice and forms of resistance to injustices. The book will be of interest to students and scholars of development, law and development, feminism, international law, environmental law, governance, politics, international relations, social justice and activism.

beyond the law 2019 cast: *Contents of Commercial Contracts* Paul S Davies, Magda Raczynska, 2020-07-23 Freedom of contract is a great strength of English law: indeed it is a key reason why English law is often the law of choice. Leading commentators take stock of recent developments such as increased reliance on good faith/discretion and the rise of smart contracts. Insodoing, they make original contributions to ongoing debates concerning the limits to parties' freedom of contract. This important subject will interest drafters of commercial contracts keen to ensure that contracts are clear and enforceable; litigators disputing the meaning, scope and validity of terms; and academics interested in the purpose and nature of the exercises involved.

beyond the law 2019 cast: *Brexit, Union, and Disunion* Sionaidh Douglas-Scott, 2023-11-09 This book provides a critical analysis of Brexit, placing it in the broader context of the historical development of the British Constitution and earlier disputes as to the meaning of statehood, sovereignty, and territorial boundaries. Some of the greatest challenges posed by the UK's withdrawal from the EU are those it places on the British Constitution, which is already 'unsettled' and under strain. This book investigates this impact, but also uniquely locates Brexit in the broader context of historically significant British 'acts of union or disunion' – such as the loss of former US colonies and British Empire, and the place of Scotland and Ireland in the Union. These precedents help us understand how a British constitutional identity has been shaped or dismantled by legal concepts of union or sovereignty.
