beyond business qatar airways: Moving the AEC Beyond 2015 Tham Siew Yean, Sanchita Basu Das, 2016-03-11 The ten Southeast Asian economies reached a milestone on 31 December 2015, when they announced the formation of an ASEAN Community. Although this includes three pillars – ASEAN Political-Security Community, ASEAN Economic Community (AEC) and the ASEAN Socio-Cultural Community – it is the economic pillar that generates immense debate, due to its expected quantifiable benefits to member countries. This book, thus, focuses on the ASEAN Economic Community and seeks to explain the need for building domestic consensus within the member countries. It starts with an overview chapter describing the current achievements of the AEC. It then explores possible explanations for the achievements/non-achievements and offers a hypothesis on conflicting economic interests in a country as one possible explanation for gaps in implementation. This is because any form of economic liberalisation brings with it the winners and losers, thereby raising resistance to liberalization measures and slowing down the implementation process. The book includes six country chapters – Indonesia, Malaysia, the Philippines, Singapore,

Thailand and Vietnam - that examine sources of domestic conflict/s in greater detail and depth. It also includes a regional chapter, co-authored by the ex-Secretary General of ASEAN, Mr Rodolfo Severino, that brings out the political nature of ASEAN economic cooperation since its inception in 1976. For ASEAN beyond 2015, the book articulates the need to obtain a strong domestic consensus that supports the integration initiatives of the AEC. This can be viewed as a way forward to accelerate and deepen integration within ASEAN. The book concludes with some suggestions on how each country can move towards achieving domestic consensus, based on the respective country level analysis.

In this deeply informative book celebrating its 75th birthday, thirty-three of the most distinguished authors in aviation law offer perspectives on the quality of the Convention's achievements, which principally address the promotion of safety and security. Emphasising the Convention's flexibility in the accommodation of social and technological changes, the authors investigate such topics and issues as the following: environmental protection measures such as abatement of noise and reduction of the damaging effects of gaseous emissions; effect of new methods of communication such as Global Navigation Satellite Systems (GNSS); distinction between civil and State aircraft; economic regulation as established under air services agreements between States; cybersecurity measures; compensation for damages; liberalisation of air services; role of regional aviation organisations, in particular, that of the European Union; position of airlines, airports, and providers of air navigation services; and territorial jurisdiction with respect to areas lacking a universally accepted sovereign status. Annexes include the original texts of the Paris Convention 1919 and the Chicago Convention 1944. With its incisive perceptions put forward by distinguished aviation lawyers - including an exploration of the absolute character of sovereignty - this book is without peer in its analysis of how the Chicago Convention affects the regulation of international civil aviation and the operation of air services. Its multifaceted approach towards the current state of affairs from a legal and policy perspective will be welcomed by practitioners and law firms in the field and civil aviation authorities, as well as by academics and business persons with a stake in aviation.

beyond business qatar airways: Qatar International Monetary Fund. Middle East and Central Asia Dept., 2019-06-03 This Selected Issues paper focuses on policies to drive diversification for Qatar. Diversification is important for a large commodity exporter like Qatar: it helps manage temporary shocks and prepare for sweeping changes to the economic setting. Qatar's large financial holdings can help diversify revenues. Both structural reforms to improve the business environment and sector-specific policies can support diversification of activity and exports. Sector-specific policies should build on existing economic strengths in areas with room for exports and innovation. Emphasis should be placed on developing expertise in specific clusters. Export markets and competition provide crucial mechanisms to ensure discipline. Further diversification is important to help Qatar manage temporary shocks and prepare for far-reaching shifts to the economic context. Well-targeted, structured, and sequenced policies to encourage specific sectors can also play a role in diversifying Qatar's economy. Export markets and competition should be deliberately used to hold recipients of support accountable. Policies to encourage specific sectors have resulted in little more than inefficient import substitution in many countries. Avoiding this outcome requires discipline: support should be withdrawn in the absence of progress.

The Business Year: Oman 2023 features interviews, articles, and analysis over 185 pages.

beyond business qatar airways: The Business Year: Qatar 2021 , 2020 will forever be remembered as the year that the COVID-19 pandemic mercilessly hit the world, leaving a trail of loss both human and economic. Resilience and diversification have been buzzwords in Qatar for some time, yet never have they taken on so much meaning. This 184-page publication aims to provide a platform for the country's decision makers at a time of global uncertainty and act as a guide for investors looking

beyond business qatar airways: *The Geographies of Air Transport* Andrew R. Goetz, Lucy Budd, 2016-03-09 Making a detailed contribution to geographies of air transport and aeromobility, this book examines the practices and processes that produce particular patterns of air transport provision both regionally and globally. In so doing, it updates the seminal contributions of Eva Taylor (1945), Kenneth Sealy (1957), Brian Graham (1995) and others to the study of air transport geography. Leading scholars in the field offer a unique insight into the key developments that have occurred in the field and the implications that these developments have had for geography, geographers, and global patterns of past, present and future air transport. Although globalization and liberalization processes have greatly expanded the demand for air transport over the last two decades, the industry has experienced several major setbacks due to economic, security, and environmental concerns. Many of these impacts have been much more pronounced in some regions, such as North America and Europe while others, such as Asia-Pacific have not been as adversely affected. Accordingly, there is a clear need to examine these recent economic and geopolitical changes from a geographical perspective given the differentiated pattern of effects from global processes. Addressing this need, this volume opens with thematic chapters covering key topics such as the historical geographies, socio-cultural mobilities, environmental externalities, urban geographies, and sustainability of the global air transport industry, followed by regional analysis of the industry in Asia-Pacific, Latin America, Greater Middle East and Africa as well as North America and Europe.

beyond business qatar airways: *Looking Beyond the Runway* Professor Nawal K Taneja, 2012-10-01 The global airline industry, facing significant changes and discontinuity is prompted and forced to deal with a new normal. Who would have imagined a few years ago that: - a significant percentage of consumers in the US now prefer to fly low-cost airlines instead of full-service airlines because they perceive the product to be better, - airlines would generate up to a third of their total income from non-ticket revenue, - many low-cost airlines would add complexity to their original simple business models through the development of code-share agreements, the use of global distribution systems, and travel agents to distribute their seats, - Jetstar, a low-cost subsidiary of Qantas, would grow faster and be more profitable than its parent, - a survey carried out by Ryanair would show that 42 percent of passengers would be willing to stand on short (one hour) flights if they could pay 50 percent less than seated passengers, - passengers could pay as little as US\$2,000 for a transatlantic Business Class ticket on top-brand airlines, - Lufthansa would have ownership in airlines based in Austria, Belgium, Italy, Switzerland, Turkey, the UK, and the US, and that it would continue to pursue equity ownership in airlines based in Poland and Scandinavia, or - the Japanese and Canadian governments would struggle to find different ways to bail out their heretofore flag carriers? To deal with this upcoming new normal, airlines have to go beyond their short-term circumstantial strategies - they need strategic renewal of their ageing business model. In this candidly-written book, Nawal Taneja explains what will separate the winners from the losers. He maintains the leaders will be the airlines that: (1) exploit this crisis-driven change to their best advantage, (2) learn to work around the airline-inherent constraints that prevent them from running their businesses just like other businesses, (3) learn from successes and failures of other global enterprises, (4) sharpen their business intelligence, analytics, and strategic agility, and (5) proactively explore the pockets of growth in this emerging-markets century. To help airline executives become informed of new competitive games, the author analyzes numerous business sectors such as auto, hospitality, retail, technology, and entertainment. For example, relevant lessons can be learned from the strategic mistakes made by the US automakers. Likewise, emergent and compelling insights can be gained in superior customer experience from Ritz Carlton and Zappos, and in value-creating innovation from Cirque du Soleil and Zipcar. The book also features a multitude of forewords from airlines and related businesses to provide readers with multiple perspectives on the changing landscape in the global airline industry. Nawal Taneja is a career

analyst of the global airline industry with wide-ranging experience in the aviation industry, academia, and public policy. Encouraged by industry executives, he has written five other books for practitioners in the global airline industry, including FASTEN YOUR SEATBELT: The Passenger is Flying the Plane and Flying Ahead of the Airplane.

beyond business qatar airways: *The Passenger Has Gone Digital and Mobile* Nawal K. Taneja, 2016-02-24 Technology is changing expectations in the airline industry. Passengers want to be in control, and they expect airlines to become solution providers and aggregators of value, to provide them with personalized services. Airline employees expect to be given the tools to do their jobs and to meet passenger expectations. Airline executives expect to make returns that are reasonable and relatively stable through business cycles. All of these expectations can be met by airlines through the effective and efficient leveraging of information and technology, to shift from being operations- and product-centric to becoming customer-centric and dramatically improving the overall passenger travel experience throughout the travel cycle. In this new book by world-renowned airline expert Nawal K. Taneja, the 7th in a series with Ashgate, the author explores and explains the game-changing opportunities presented to the industry by new-generation information and technology. He shows how information and technology can now drive, not just enable, an airline's strategy to become truly customer-centric at a personalized level, while at the same time enabling the operator to reduce costs, enhance revenues, reduce risks and become much more flexible and agile by better managing complexity.

beyond business qatar airways: Qatar and the Arab Spring Kristian Ulrichsen, 2014 *Qatar and the Arab Spring* offers a frank examination of Qatar's startling rise to regional and international prominence, describing how its distinctive policy stance toward the Arab Spring emerged. In only a decade, Qatari policy-makers - led by the Emir, Sheikh Hamad bin Khalifa Al-Thani, and his prime minister Sheikh Hamad bin Jassim Al-Thani - catapulted Qatar from a sleepy backwater to a regional power with truly international reach. In addition to pursuing an aggressive state-branding strategy with its successful bid for the 2022 FIFA World Cup, Qatar forged a reputation for diplomatic mediation that combined intensely personalized engagement with financial backing and favorable media coverage through the Al-Jazeera. These factors converged in early 2011 with the outbreak of the Arab Spring revolts in North Africa, Syria, and Yemen, which Qatari leaders saw as an opportunity to seal their regional and international influence, rather than as a challenge to their authority, and this guided their support of the rebellions against the Gaddafi and Assad regimes in Libya and Syria. From the high watermark of Qatari influence after the toppling of Gaddafi in 2011, that rapidly gave way to policy overreach in Syria in 2012, Coates Ulrichsen analyses Qatari ambition and capabilities as the tiny emirate sought to shape the transitions in the Arab world.
