Veganism is a practice that allows for environmentally responsible consumer choices that are viewed, particularly in the West, as oppositional to an economy that is largely dependent upon big agriculture. This groundbreaking collection exposes this disruption, critiques it, and offers a new roadmap for navigating and reimagining popular culture representations on veganism. These essays engage a wide variety of political, historical, and cultural issues, including contemporary political and social circumstances, emergent veganism in Eastern Europe, climate change, and the Syrian refugee crisis, among other topics. *Through a Vegan Studies Lens* significantly furthers the conversation of what a vegan studies perspective can be and illustrates why it should be an integral part of cultural studies and critical theory.
