i am black history: America I AM Black Facts Quintard Taylor, 2009-02-02 Time is the great equalizer. No person, race, culture, or nation stands beyond its reach or can alter its inevitable progress. Timelines, lists of events in chronological order as they happened, allow us to understand the historical past as the evolution of events and eras. In the case of African American history, which has often been subject to blatant and subtle distortion, a timeline can both set the record straight, and expand our knowledge in new and exciting ways. America I AM Black Facts, a companion volume to the four-year touring museum exhibition, America I AM: The African American Imprint created by Tavis Smiley, offers an introduction to the rich, complex, tragic, and triumphal history of the forty million people of African descent over five centuries in what is now the United States. This

fascinating volume features six timelines that chronicle the indelible imprint African Americans have made on the life, history, and culture of the United States and the world.

i am black history: *The Black History of the White House* Clarence Lusane, 2013-01-23 The Black History of the White House presents the untold history, racial politics, and shifting significance of the White House as experienced by African Americans, from the generations of enslaved people who helped to build it or were forced to work there to its first black First Family, the Obamas. Clarence Lusane juxtaposes significant events in White House history with the ongoing struggle for democratic, civil, and human rights by black Americans and demonstrates that only during crises have presidents used their authority to advance racial justice. He describes how in 1901 the building was officially named the "White House" amidst a furious backlash against President Roosevelt for inviting Booker T. Washington to dinner, and how that same year that saw the consolidation of white power with the departure of the last black Congressman elected after the Civil War. Lusane explores how, from its construction in 1792 to its becoming the home of the first black president, the White House has been a prism through which to view the progress and struggles of black Americans seeking full citizenship and justice. "Clarence Lusane is one of America's most thoughtful and critical thinkers on issues of race, class and power."—Manning Marable Barack Obama may be the first black president in the White House, but he's far from the first black person to work in it. In this fascinating history of all the enslaved people, workers and entertainers who spent time in the president's official residence over the years, Clarence Lusane restores the White House to its true colors.—Barbara Ehrenreich Reading The Black History of the White House shows us how much we DON'T know about our history, politics, and culture. In a very accessible and polished style, Clarence Lusane takes us inside the key national events of the American past and present. He reveals new dimensions of the black presence in the US from revolutionary days to the Obama campaign. Yes, 'black hands built the White House'—enslaved black hands—but they also built this country's economy, political system, and culture, in ways Lusane shows us in great detail. A particularly important feature of this book its personal storytelling: we see black political history through the experiences and insights of little-known participants in great American events. The detailed lives of Washington's slaves seeking freedom, or the complexities of Duke Ellington's relationships with the Truman and Eisenhower White House, show us American racism, and also black America's fierce hunger for freedom, in brand new and very exciting ways. This book would be a great addition to many courses in history, sociology, or ethnic studies courses. Highly recommended!—Howard Winant The White House was built with slave labor and at least six US presidents owned slaves during their time in office. With these facts, Clarence Lusane, a political science professor at American University, opens The Black History of the White House(City Lights), a fascinating story of race relations that plays out both on the domestic front and the international stage. As Lusane writes, 'The Lincoln White House resolved the issue of slavery, but not that of racism.' Along with the political calculations surrounding who gets invited to the White House are matters of musical tastes and opinionated first ladies, ingredients that make for good storytelling.—Boston Globe Dr. Clarence Lusane has published in The Washington Post, The Miami Herald, The Baltimore Sun, Oakland Tribune, Black Scholar, and Race and Class. He often appears

on PBS, BET, C-SPAN, and other national media.

i am black history: Teaching Black History to White People Leonard N. Moore, 2021-09-14 Leonard Moore has been teaching Black history for twenty-five years, mostly to white people. Drawing on decades of experience in the classroom and on college campuses throughout the South, as well as on his own personal history, Moore illustrates how an understanding of Black history is necessary for everyone. With *Teaching Black History to White People*, which is "part memoir, part Black history, part pedagogy, and part how-to guide," Moore delivers an accessible and engaging primer on the Black experience in America. He poses provocative questions, such as "Why is the teaching of Black history so controversial?" and "What came first: slavery or racism?" These questions don't have easy answers, and Moore insists that embracing discomfort is necessary for engaging in open and honest conversations about race. Moore includes a syllabus and other tools for actionable steps that white people can take to move beyond performative justice and toward racial reparations, healing, and reconciliation.

i am black history: Critical Reflections on Black History William D. Wright, 2002-03-30 Wright presents this collection of six essays on aspects of black history. Each essay is based upon a critical historical methodology that is comprised of, among other things, a racial analysis, an intersectional analysis, rigorous logic, conceptual integrity, and a critical analysis of ideas, words, and images. Critical of the romantic approach to the subject, Wright seeks to uncover a deeper analysis, knowledge, and truth regarding aspects of black history, even when it involves the presentation of material and viewpoints that some might find objectionable. He predicates these pieces on the idea that history is still a valuable subject, firmly rejecting the postmodern view that it has lost its validity. Wright demonstrates that black history is a vital and necessary subject, not only for black people, but for all Americans. A critical black history is itself, Wright contends, a device to evaluate American history in a critical manner, to get into the subject more deeply, and to adduce deeper knowledge and truths about it. These essays show the author's interest in strengthening that critical capacity of black historical writing and his belief that this is a primary and necessary means to maintain the viability and productivity of the academic discipline and to ward off its detractors.

i am black history: Selling Black History for Carter G. Woodson Arvarh E. Strickland, 2018-02-28 In the summer of 1930, Lorenzo Johnston Greene, a graduate of Howard University and a doctoral candidate at Columbia University, became a book agent for the man with the undisputed title of Father of Negro History, Carter G. Woodson. With little more than determination, Greene, along with four Howard University students, traveled throughout the South and Southeast selling books published by Woodson's Associated Publishers. Their dual purpose was to provide needed funds for the Association for the Study of Negro Life and History and to promote the study of African American history. Greene returned east by way of Chicago, and, for a time, he settled in Philadelphia, selling books there and in the nearby cities of Delaware and New Jersey. He left Philadelphia in 1931 to conduct a survey in Washington, D.C., of firms employing and not employing black workers. From 1930 until 1933, when Greene began teaching at Lincoln University in Jefferson City, Missouri, *Selling Black History for Carter G. Woodson* provides a unique firsthand account of conditions in African American communities during the Great Depression. Greene describes in the diary, often in lyrical terms, the places and people he visited. He provides poignant descriptions of what was happening to black professional and business people, plus working-class people, along

with details of high school facilities, churches, black business enterprises, housing, and general conditions in communities. Greene also gives revealing accounts of how the black colleges were faring in 1930. *Selling Black History* for Carter G. Woodson offers important glimpses into the private thoughts of a young man of the 1930s, a developing intellectual and scholar. Greene's diary also provides invaluable insights into the personality of Carter Woodson that are not otherwise available. This fascinating and comprehensive view of black America during the early thirties will be a welcome addition to African American studies.
