i ain t no musician interview: New York and the International Sound of Latin Music, 1940-1990 Benjamin Lapidus, 2020-12-28 New York City has long been a generative nexus for the transnational Latin music scene. Currently, there is no other place in the Americas where such large numbers of people from throughout the Caribbean come together to make music. In this book, Benjamin Lapidus seeks to recognize all of those musicians under one mighty musical sound, especially those who have historically gone unnoticed. Based on archival research, oral histories, interviews, and musicological analysis, Lapidus examines how interethnic collaboration among musicians, composers, dancers, instrument builders, and music teachers in New York City set a standard for the study, creation, performance, and innovation of Latin music. Musicians specializing in Spanish Caribbean music in New York cultivated a sound that was grounded in tradition, including classical, jazz, and Spanish Caribbean folkloric music. For the first time, Lapidus studies this sound in detail and in its context. He offers a fresh understanding of how musicians made and formally transmitted Spanish Caribbean popular music in New York City from 1940 to 1990. Without diminishing the historical facts of segregation and racism the musicians experienced, Lapidus treats music as a unifying force. By giving recognition to those musicians who helped bridge the gap between cultural and musical backgrounds, he recognizes the impact of entire ethnic groups who helped change music in New York. The study of these individual musicians through interviews and musical transcriptions helps to characterize the specific and identifiable New York City Latin music aesthetic that has come to be emulated internationally.

i ain t no musician interview: Bruce Springsteen and Popular Music William I. Wolff, 2017-07-20 This interdisciplinary volume enters the scholarly conversation about Bruce Springsteen at the moment when he has reinforced his status of global superstar and achieved the status of social critic. The collection engages Springsteen and popular music as his contemporary work is just beginning to be understood in terms of its impact on popular culture and music, applying new areas of inquiry to Springsteen and putting Springsteen fan writing within the same binding as academic writing to show how together they create a more nuanced understanding of an artist. Established and emerging Springsteen scholars approach work from disciplines including rhetoric and composition, historical musicology, labor studies, American history, literature, communications, sociology, theology, and government. Offering context, critique, and expansive understanding of Springsteen and his work, this book contributes to Springsteen scholarship and the study of popular music by showing Springsteen's broadening academic appeal as well as his escalating legacy on new musicians, social consciousness, and contemporary culture.

i ain t no musician interview: Negotiating Difference in French Louisiana Music Sara Le Menestrel, 2014-12-19 Sara Le Menestrel explores the role of music in constructing, asserting,

erasing, and negotiating differences based on the notions of race, ethnicity, class, and region. She discusses established notions and brings to light social stereotypes and hierarchies at work in the evolving French Louisiana music field. She also draws attention to the interactions between oppositions such as black and white, urban and rural, differentiation and creolization, and local and global. *Le Menestrel* emphasizes the importance of desegregating the understanding of French Louisiana music and situating it beyond ethnic or racial identifications, amplifying instead the importance of regional identity. Musical genealogy and categories currently in use rely on a racial construct that frames African and European lineage as an essential difference. Yet as the author samples music in the field and discovers ways music is actually practiced, she reveals how the insistence on origins continually interacts with an emphasis on cultural mixing and creative agency. This book finds French Louisiana musicians navigating between multiple identifications, musical styles, and legacies while market forces, outsiders' interest, and geographical mobility also contribute to shape musicians' career strategies and artistic choices. The book also demonstrates the decisive role of non-natives' enthusiasm and mobility in the validation, evolution, and reconfiguration of French Louisiana music. Finally, the distinctiveness of South Louisiana from the rest of the country appears to be both nurtured and endured by locals, revealing how political domination and regionalism intertwine.

i ain t no musician interview: [The North American Folk Music Revival: Nation and Identity in the United States and Canada, 1945-1980](#) Gillian Mitchell, 2016-02-17 This work represents the first comparative study of the folk revival movement in Anglophone Canada and the United States and combines this with discussion of the way folk music intersected with, and was structured by, conceptions of national affinity and national identity. Based on original archival research carried out principally in Toronto, Washington and Ottawa, it is a thematic, rather than general, study of the movement which has been influenced by various academic disciplines, including history, musicology and folklore. Dr Gillian Mitchell begins with an introduction that provides vital context for the subject by tracing the development of the idea of 'the folk', folklore and folk music since the nineteenth century, and how that idea has been applied in the North American context, before going on to examine links forged by folksong collectors, artists and musicians between folk music and national identity during the early twentieth century. With the 'boom' of the revival in the early sixties came the ways in which the movement in both countries proudly promoted a vision of nation that was inclusive, pluralistic and eclectic. It was a vision which proved compatible with both Canada and America, enabling both countries to explore a diversity of music without exclusiveness or narrowness of focus. It was also closely linked to the idealism of the grassroots political movements of the early 1960s, such as integrationist civil rights, and the early student movement. After 1965 this inclusive vision of nation in folk music began to wane. While the celebrations of the Centennial in Canada led to a re-emphasis on the 'Canadianness' of Canadian folk music, the turbulent events in the United States led many ex-revivalists to turn away from politics and embrace new identities as introspective singer-songwriters. Many of those who remained interested in traditional folk music styles, such as Celtic or Klezmer music, tended to be very insular and conservative in their approach, rather than linking their chosen genre to a wider world of folk music; however, more recent attempts at 'fusion' or 'world' music suggest a return to the eclectic spirit of the 1960s folk revival. Thus, from 1945 to 1980, folk music in Canada and America experienced an evolving and complex relationship with the concepts of nation and national identity. Students will find the book useful as an introduction, not only to key themes in the folk revival, but also to concepts in the study of national identity and to topics in American and Canadian cultural history. Academic specialists will encounter an alternative perspective from the more general, broad approach offered by earlier histories of the folk revival movement.
