**mediacom tv guide channel: Worlding** David Trend, 2015-11-17 *Worlding* brings ideas about virtual places and societies together with perceptions about the real world in an era of mounting global uncertainty. As mass media and the Internet consume ever-increasing portions of our lives, are we becoming disengaged from face-to-face human interaction and real-world concerns? Or is the virtual world actually bringing people closer together and making them more involved with social issues? *Worlding* argues that the virtual and the real are profoundly interconnected, often in ways we don't fully appreciate. Drawing on sociology, cultural studies, philosophy, media analysis, and technology studies, *Worlding* makes the argument that virtual experience and social networking can be vital links to utopian visions and an appreciation of the world's diversity.
