medicine lyrics the 1975: Perplexing Remedies in Ancient Medicine Maddalena Rumor, 2024-11-18 The topic of a potential relationship between Babylonian and Greco-Roman medicine has been discussed for a long time, yet it is notoriously difficult to give it flesh and bones by means of concrete examples. The main goal of this study is to identify real elements in the therapeutical traditions of the one system that can be connected to those of the other, which would confirm a certain degree of practical knowledge-sharing between the two cultures. By analyzing Drekapotheke (filthy medicaments) and similarly perplexing medical ingredients, and by exploiting the concept of misunderstandings in translation, I show how elements of Assyro-Babylonian therapy were still present or emerging in the pharmaceutical compositions of the Early Roman Empire, ultimately supporting the idea of at least occasional transfers of medical knowledge between the two cultures. With its positive findings, this study contributes to a broader reconstruction of the context within which ancient medicine developed. It also finds reciprocal explanations of obscure passages and fuels further questions regarding the medical interrelations/interconnections between these neighboring ancient cultures.

medicine lyrics the 1975: Green Medicine Larry Malerba, D.O., 2011-03-15 According to Dr. Larry Malerba, modern medicine has perfected the short-term technical repair of the physical body

at the expense of the long-term psychological and spiritual well-being of the whole person. In *Green Medicine* he examines this issue and provides a realistic blueprint for wellness and a valuable guide for those seeking deeper and more lasting healing. Written in an accessible style, the book draws on a rich range of fields—physics, philosophy, Jungian thought, shamanism, alchemy, Eastern thought, Western esotericism, sustainability, orthodox medicine—to create a green medical paradigm that represents a powerful integrative medical perspective. Dr. Malerba interweaves case histories from his own practice with innovative concepts from alternative and Western medicine in order to address a number of crucial questions: • What are the personal and environmental costs to the overuse of pharmaceutical drugs? • Is conventional medicine as scientific as it claims to be? • How can conventional doctors and alternative healers begin to work together? • How can individuals transform medicine and become participants in their own healthcare? *Green Medicine* offers a practical and philosophical basis for building a viable green alternative that draws on the inherent unity of body, heart, mind, soul, and nature.

medicine lyrics the 1975: *Narrating Medicine in Middle English Poetry* Eve Salisbury, 2022-08-11 Exploring medical writing in England in the 100+ years after the advent of the “Great Mortality”, this book examines the storytelling practices of poets, patients, and physicians in the midst of a medieval public health crisis and demonstrates how literary narratives enable us to see a kinship between poetry and the healing arts. Looking at how we can learn to diagnose a text as if we were diagnosing a body, Salisbury provides new insights into how we can recuperate the voices of those afflicted by illness in medieval texts when we have no direct testimony. She considers how we interpret stories told by patients in narratives mediated by others, ways that women factor into the shaping of a medical canon, how medical writing intersects with religious belief and memorial practices governed by the Church, and ways that regimens of health benefit a population in the throes of an epidemic.

medicine lyrics the 1975: *Socializing Medicine* Pao-chen Tang, Yuqian Yan, Ling Zhang , 2025-01-07 In *Socializing Medicine*, Pao-chen Tang, Yuqian Yan, and Ling Zhang explore the intersections of medicine, health, and East Asian media. Interweaving archival research, audiovisual analyses, and theoretical insights from the emerging field of health humanities, the book reveals the multifaceted ways in which the mass media—from photography and film to television and live streaming—has been deployed as a tool for controlling medicine and health, privileging those with power and authority from the early twentieth century to the present. Adopting anti-colonial and anti-capitalist perspectives, the contributors in this volume challenge the dominant mediations of health against the backdrop of imperialism, Cold War geopolitical tensions, and neoliberal capitalism. Collectively, they advocate for alternative understandings of medical culture through media productions that envision accessible and equitable healthcare practices. “This groundbreaking anthology diverges from Eurocentric models to span the celluloid past and digital present and investigate how East Asia offers not only illuminating examples of media shaping the socially based construction of health and medicine, but also some fascinating alternatives to state-centered efforts to bind the body to the nation.” —Aaron Gerow, Yale University “Expanding the boundaries of health humanities and media studies simultaneously, *Socializing Medicine* presents an enthralling picture of the ideological significance of medical media in East Asia. Its transnational and intermedial approach wisely recognizes that media, like viruses, rarely remain stable entities or respect national borders. An essential addition to the growing literature on the relationship between media, medicine, and power.” —Scott Curtis, Northwestern University

medicine lyrics the 1975: Religion, Devotion and Medicine in North India Fabrizio M. Ferrari, 2014-11-20 This volume examines notions of health and illness in North Indian devotional culture, with particular attention paid to the worship of the goddess Sitala, the Cold Lady. Consistently portrayed in colonial and postcolonial literature as the ambiguous 'smallpox goddess', Sitala is here discussed as a protector of children and women, a portrayal that emerges from textual sources as well as material culture. The eradication of smallpox did not pose a threat to Sitala and her worship. She continues to be an extremely popular goddess. *Religion, Devotion and Medicine in*

North India critically examines the rise and affirmation of the 'smallpox myth' in India and beyond, and explains how Indian narratives, ritual texts and devotional songs have celebrated Sitala as a loving mother who protects her children from the effects, and the fear, of poxes, fevers and infantile disorders but also all sorts of new threats (such as global pandemics, addictions and environmental catastrophes). The book explores a wide range of ritual and devotional practices, including scheduled festivals, songs, vows, pageants, austerities, possession, animal sacrifices and various forms of offering. Built on extensive fieldwork and a close textual analysis of sources in Sanskrit and vernacular languages (Hindi, Bhojpuri and Bengali) as well as on a rich bibliography on the struggle against smallpox in colonial and post-colonial India, the book reflects on the ambiguous nature of Sitala as a phenomenon largely dependent on the enduring fascination with the exotic, and the horrific, that has pervaded public renditions of Indian culture in indigenous fiction, colonial reports, medical literature and now global culture. To aid study, the volume includes images, web links, appendixes and a filmography.

medicine lyrics the 1975: Social Aspects of Health, Medicine and Disease in the Colonial and Post-colonial Era Henk Menke, Jane Buckingham, Farzana Gounder, Ashutosh Kumar, Maurits S. Hassankhan, 2020-12-02 From the 1600s, enslaved people, and after abolition of slavery, indentured labourers were transported to work on plantations in distant European colonies. Inhuman conditions and new pathogens often resulted in disease and death. Central to this book is the encounter between introduced and local understanding of disease and the therapeutic responses in the Caribbean, Indian and Pacific contexts. European response to diseases, focussed on protecting the white minority. Enslaved labourers from Africa and indentured labourers from India, China and Java provided interpretations and answers to health challenges based on their own cultures and medicinal understanding of the plants they had brought with them or which they found in the natural habitat of their new homes. Colonizers, enslaved and indentured labourers learned from each other and from the indigenous peoples who were marginalized by the expansion of plantations. This volume explores the medical, cultural and personal implications of these encounters, with the broad concept of medical pluralism linking the diversity of regional and cultural focus offered in each chapter. medicine lyrics the 1975: Sixties Radicals, Then and Now Ron Chepesiuk, 2007-12-26 Aroused by gains in civil rights and galvanized by the antiwar movement, radical leaders of the 1960s sought to make revolutionary changes in American society. Partly through their leadership, a generation was awakened by the call for a counterculture. That generation is now responsible for the same social and political structures they so adamantly, and sometimes violently, opposed. How did the sixties affect the counterculture leaders? medicine lyrics the 1975: Perverse Romanticism Richard C. Sha, 2009-01-12 Richard C. Sha's revealing study considers how science shaped notions of sexuality, reproduction, and gender in the Romantic period. Through careful and imaginative readings of various scientific texts, the philosophy of Immanuel Kant and Longinus, and the works of such writers as William Blake, Percy Bysshe Shelley, Mary Wollstonecraft, and Lord Byron, Sha explores the influence of contemporary aesthetics and biology on literary Romanticism. Revealing that ideas of sexuality during the Romantic era were much more fluid and undecided than they are often characterized in the existing scholarship, Sha's innovative study complicates received claims concerning the shift from perversity to perversion in the nineteenth century. He observes that the questions of perversity—or purposelessness—became simultaneously critical in Kantian aesthetics, biological functionalism, and Romantic ideas of private and public sexuality. The Romantics, then, sought to reconceptualize sexual pleasure as deriving from mutuality rather than from the biological purpose of reproduction. At the nexus of Kantian aesthetics, literary analysis, and the history of medicine, *Perverse Romanticism* makes an important contribution to the study of sexuality in the long eighteenth century.

medicine lyrics the 1975: On the Importance of Being an Individual in Renaissance Italy Douglas Biow, 2015-02-04 In recent decades, scholars have vigorously revised Jacob Burckhardt's notion that the free, untrammled, and essentially modern Western individual emerged in Renaissance Italy. Douglas Biow does not deny the strong cultural and historical constraints that placed limits on identity formation in the early modern period. Still, as he contends in this witty, reflective, and generously illustrated book, the category of the individual was important and highly complex for a variety of men in this particular time and place, for both those who belonged to the elite and those who aspired to be part of it. Biow explores the individual in light of early modern Italy's new patronage systems, educational programs, and work opportunities in the context of an increased investment in professionalization, the changing status of artisans and artists, and shifting attitudes about the ideology of work, fashion, and etiquette. He turns his attention to figures familiar (Benvenuto Cellini, Baldassare Castiglione, Niccolò Machiavelli, Jacopo Tintoretto, Giorgio Vasari) and somewhat less so (the surgeon-physician Leonardo Fioravanti, the metallurgist Vannoccio Biringuccio). One could excel as an individual, he demonstrates, by possessing an indefinable *nescio quid*, by acquiring, theorizing, and putting into practice a distinct body of professional knowledge, or by displaying the exclusively male adornment of impressively designed facial hair. Focusing on these and other matters, he reveals how we significantly impoverish our understanding of the past if we dismiss the notion of the individual from our narratives of the Italian and the broader European Renaissance.

medicine lyrics the 1975: Ecological Emotions Ondřej Beran, 2025-09-30 In this book, Ondřej Beran explores the various emotions that arise in response to the perceived and observed climate crisis. He provides a focused philosophical overview of ecological emotions (mostly negative ones, such as grief) and reflects on some of their characteristics. He also addresses the nature of their interconnection, and their status as potentially lucid and justified recognitions of a compromised value. In general, Beran's interest is in thinking of these emotions as peculiar forms of understanding, and in exploring what these forms of understanding show us about living in a world that we see as seriously damaged or under serious risk. He argues that these forms of understanding are cultivated and expressed in various ways and can take very diverse, even idiosyncratic shapes. Ultimately, he highlights the important role played by the reflective distance in many of our emotional responses to the climate crisis, as they also incorporate and shape how we understand our individual lives. Special attention is paid here to "light-heartedly pessimistic" takes on one life, in relation to the climate crisis, and to a critical reflection of the problematic aspects of this reflection, especially its enabling conditions (which would represent natural openings for further discussions, whether post-colonial, Marxist, feminist, or general political critiques). The book is, methodologically, seated primarily in the tradition of post-Wittgensteinian philosophy (ethics), building upon previous theoretical work on examples in philosophy. But it relies on other resources as well: cognitivist approaches to emotion (Solomon, Nussbaum, Rorty), existential phenomenology (Ratcliffe), or Adornoian dialectics.

medicine lyrics the 1975: The Spirit of Praise Monique M. Ingalls, Amos Yong, 2015-06-18 In The Spirit of Praise, Monique Ingalls and Amos Yong bring together a multidisciplinary, scholarly exploration of music and worship in global pentecostal-charismatic Christianity at the beginning of the twenty-first century. The Spirit of Praise contends that gaining a full understanding of this influential religious movement requires close listening to its songs and careful attention to its patterns of worship. The essays in this volume place ethnomusicological, theological, historical, and sociological perspectives into dialogue. By engaging with these disciplines and exploring themes of interconnection, interface, and identity within musical and ritual practices, the essays illuminate larger social processes such as globalization, sacralization, and secularization, as well as the role of religion in social and cultural change. Aside from the editors, the contributors are Peter Althouse, Will Boone, Mark Evans, Ryan R. Gladwin, Birgitta J. Johnson, Jean Ngoya Kidula, Miranda Klaver, Andrew Mall, Kimberly Jenkins Marshall, Andrew M. McCoy, Martijn Oosterbaan, Dave Perkins, Wen Reagan, Tanya Riches, Michael Webb, and Michael Wilkinson.
