meditation marcus aurelius free: The Meditations of Marcus Aurelius Marcus Aurelius, 2011-05 *Meditations* (thoughts/writings addressed to himself) is a series of personal writings by Marcus Aurelius, Roman Emperor 161-180 CE, setting forth his ideas on Stoic philosophy. Marcus Aurelius wrote the 12 books of the *Meditations* in highly-educated Koine Greek as a source for his own guidance and self-improvement. It is possible that large portions of the work were written at Sirmium, where he spent much time planning military campaigns from 170 to 180. Some of it was written while he was positioned at Aquincum on campaign in Pannonia, because internal notes tell us that the second book was written when he was campaigning against the Quadi on the river Granova (modern-day Hron) and the third book was written at Carnuntum. It is not clear that he ever intended the writings to be published, so the title *Meditations* is but one of several commonly assigned to the collection. These writings take the form of quotations varying in length from one sentence to long paragraphs. His stoic ideas often involve avoiding indulgence in sensory affections, a skill which, he says, will free a man from the pains and pleasures of the material world. He claims that the only way a man can be harmed by others is to allow his reaction to overpower him. An order or logos permeates existence. Rationality and clear-mindedness allow one to live in harmony with the logos. This allows one to rise above faulty perceptions of good and bad. (wikipedia.org)

Herein, one may learn to reason like a Stoic, which leads to making progress toward living in accord with nature, and from which an abiding happiness is produced. *Secundum Naturam* is an exploration of Stoicism, given the thesis that the philosophical doctrines derive from Stoic logic. Itself, Stoic logic derives from one, first principle: contradiction does not exist in nature, although we contradict nature when we err. The connectives, modalities, and argument resolutions are all defined with respect to contradiction as conflict (between Both p and Not p). And when your will contradicts nature, you are living contrary to nature, while the goal is to live *secundum naturam*, according to nature. Best of all, learn how to improve yourself with Stoic logic, according to reason, according to nature, only with *Secundum Naturam*.

meditation marcus aurelius free: Hypnosis and meditation Amir Raz, Michael Lifshitz, 2016-04-08 Research over the past decade has helped to demystify hypnosis and meditation, bringing these practices into the scientific and clinical mainstream. Yet, while hypnosis and meditation overlap on many levels, few scientific accounts have explored their complementary rapprochement. Despite cultural and historical differences, hypnosis and meditation share common phenomenology, cognitive processes, and potential therapeutic merits. This book provides a synthesis of knowledge concerning the bridging of hypnosis and meditation. The authors adopt a trans-disciplinary approach considering cultural, historical, and philosophical perspectives to elucidate contemporary questions in cognitive, neurobiological, and clinical science. The book explores the relationship between hypnosis and meditation in five progressive sections: Part 1 investigates historical, cultural, and philosophical issues to contextualize the scientific study of contemplative practices. Part 2 presents a range of views concerning the similarities and differences between hypnosis and meditation. Part 3 explores the psychological and cognitive mechanisms at work. Part 4 integrates recent brain imaging findings to unravel the neural underpinnings. Finally, part 5 examines how juxtaposing hypnosis and meditation can enhance clinical applications. Hypnosis and Meditation is a valuable resource to both specialists as well as interested lay readers, and paves the road to a more unified science of how attention influences states of brain, body, and consciousness.
