political map of west africa: *Terrorism and Political Violence in West Africa: a Global Perspective* Adebayo E. Adeyemi, Mahmoud N. Musa, 2015-07-30 While it could be arguably stated that West Africa has achieved remarkable and sustainable progress in the areas of democratic governance and economic growth, the sub-region, over the past few years, has been challenged by terrorism and other transnational security threats. Innocent civilians are continuously killed; security operatives and providers of humanitarian assistance targeted; properties and infrastructure wantonly destroyed; thus culminating in significant displacement of people and acute poverty. If these developments are not carefully and timeously addressed, they are capable of eroding progress so far recorded. It is against this background, that this Thesis undertakes a study of the different manifestations of terrorism and related transnational security challenges in West Africa, to explore the internal and external sources and drivers of instability; establish the linkages between terrorism and transnational threats; examine the various steps taken in recent time to strengthen the sub-regions capacity to prevent and address the menace of terrorism and other security challenges, and make necessary policy recommendations based on comprehensive best practices.

political map of west africa: The Atlantic and Africa Dale W. Tomich, Paul E. Lovejoy, 2021-08-01 The Atlantic and Africa breaks new ground by exploring the connections between two bodies of scholarship that have developed separately from one another. On the one hand, the second slavery perspective that has reinterpreted the relation of Atlantic slavery and capitalism by emphasizing the extraordinary expansion of new frontiers of slave commodity production and their role in the economic, social, and political transformations of the nineteenth-century world-economy. On the other hand, Africanist scholarship that has established the importance of slavery and slave trading in Africa to the political, economic and social organization of African societies during the nineteenth century. Taken together, these two movements enable us to delineate the processes forming the capitalist world-economy, establish its specific geographical and historical structure, and reintegrates Africa into the transformations in the world economy. This volume explores this paradigm at diverse levels ranging from state formation and the reorganization of world markets to the creation of new social roles and identities.

political map of west africa: *Global Storms and Africa in World Politics* Gorden Moyo, Sabelo J. Ndlovu-Gatsheni, 2025-04-10 Africa provides a unique perspective to understand today's global crises. This book explores how Africa, positioned historically in a subaltern role due to colonialism, offers a critical lens on the shifting dynamics of the modern world system. The book presents how Africa's continued struggles against racism, colonialism, and economic exploitation make it a powerful site for rethinking the global order. Addressing ecological, ideological, financial, health, and systemic crises, the book demonstrates how problems in Africa are intrinsically linked to global issues. It argues that the so-called decolonization after 1945 was superficial, maintaining global hierarchies that marginalize Africa. With insights from thinkers like Nkrumah and Rodney, it challenges the entrenched structures of racial capitalism and offers new pathways for genuine global equity and justice. This book will appeal to students, scholars, and researchers of international relations, economics, political science, and related disciplines, as well as policy-makers interested in a better understanding of the ongoing global power shift and Africa's challenges and position within the modern world system.
