team writing a guide to working in groups: Teaching through the Archives Tarez Samra Graban, Wendy Hayden, 2022-06-09 Disruptive pedagogies for archival research In a cultural moment when institutional repositories carry valuable secrets to the present and past, this collection argues for the critical, intellectual, and social value of archival instruction. Graban and Hayden and 37 other contributors examine how undergraduate and graduate courses in rhetoric, history, community literacy, and professional writing can successfully engage students in archival research in its many forms, and successfully model mutually beneficial relationships between archivists, instructors, and community organizations. Combining new and established voices from related fields, each of the book's three sections includes a range of form-disrupting pedagogies. Section I focuses on how approaching the archive primarily as text fosters habits of mind essential for creating and using archives, for critiquing or inventing knowledge-making practices, and for being good stewards of private and public collections. Section II argues for conducting archival projects as collaboration through experiential learning and for developing a preservationist consciousness through disciplined research. Section III details praxis for revealing, critiquing, and intervening in historic racial omissions and gaps in the archives in which we all work. Ultimately, contributors explore archives as sites of activism while also raising important questions that persist in rhetoric and composition scholarship, such as how to decolonize research methodologies, how to conduct teaching and research that promote social justice, and how to shift archival consciousness toward more engaged notions of democracy. This collection highlights innovative classroom and curricular course models for teaching with and through the archives in rhetoric and composition and beyond.

team writing a guide to working in groups: *AI and Humanity* Illah Reza Nourbakhsh, Jennifer Keating, 2020-03-10 An examination of the implications for society of rapidly advancing artificial intelligence systems, combining a humanities perspective with technical analysis; includes exercises and discussion questions. *AI and Humanity* provides an analytical framing and a common language for understanding the effects of technological advances in artificial intelligence on society. Coauthored by a computer scientist and a scholar of literature and cultural studies, it is unique in combining a humanities perspective with technical analysis, using the tools of literary explication to examine the societal impact of AI systems. It explores the historical development of these technologies, moving from the apparently benign Roomba to the considerably more sinister semi-autonomous weapon system Harpy. The book is driven by an exploration of the cultural and etymological roots of a series of keywords relevant to both AI and society. Works examined range from *Narrative of the Life of Frederick Douglass*, given a close reading for its themes of literacy and agency, to Simon Head's critique of the effects of surveillance and automation on the Amazon labor force in *Mindless*. Originally developed as a textbook for an interdisciplinary humanities-science course at Carnegie Mellon, *AI & Humanity* offers discussion questions, exercises (including journal writing and concept mapping), and reading lists. A companion website provides updated resources and a portal to a video archive of interviews with AI scientists, sociologists, literary theorists, and others.

team writing a guide to working in groups: *Re/Writing the Center* Susan Lawrence, Terry Myers Zawacki, 2019-03-15 *Re/Writing the Center* illuminates how core writing center pedagogies and institutional arrangements are complicated by the need to create intentional, targeted support for advanced graduate writers. Most writing center tutors are undergraduates, whose lack of familiarity with the genres, preparatory knowledge, and research processes integral to graduate-level writing can leave them underprepared to assist graduate students. Complicating the issue is that many of the graduate students who take advantage of writing center support are international students. The essays in this volume show how to navigate the divide between traditional writing center theory and practices, developed to support undergraduate writers, and the growing demand for writing centers to meet the needs of advanced graduate writers. Contributors address core assumptions of writing center pedagogy, such as the concept of peers and peer tutoring, the emphasis on one-to-one tutorials, the positioning of tutors as generalists rather than specialists, and even the notion of the writing center as the primary location or center of the tutoring process. *Re/Writing the Center* offers an imaginative perspective on the benefits writing centers can offer to graduate students and on the new possibilities for inquiry and practice graduate students can inspire in the writing center. team writing a guide to working in groups: *A Guide to Teaching in the Active Learning Classroom* Paul Baepler, J. D. Walker, D. Christopher Brooks, Kem Saichaie, Christina I. Petersen, 2023-07-03 While Active Learning Classrooms, or ALCs, offer rich new environments for learning, they present many new challenges to faculty because, among other things, they eliminate the room's central focal point and disrupt the conventional seating plan to which faculty and students have become accustomed. The importance of learning how to use these classrooms well and to capitalize on their special features is paramount. The potential they represent can be realized only when they facilitate improved learning outcomes and engage students in the learning process in a manner different from traditional classrooms and lecture halls. This book provides an introduction to ALCs, briefly covering their history and then synthesizing the research on these spaces to provide faculty with empirically based, practical guidance on how to use these unfamiliar spaces effectively. Among the questions this book addresses are: • How can instructors mitigate the apparent lack of a central focal point in the space? • What types of learning activities work well in the ALCs and take advantage of the affordances of the room? • How can teachers address familiar classroom-management challenges in these unfamiliar spaces? • If assessment and rapid feedback are critical in active learning, how do they work in a room filled with circular tables and no central focus point? • How do instructors balance group learning with the needs of the larger class? • How can students be held accountable when many will necessarily have their backs facing the instructor? • How can instructors evaluate the effectiveness of their teaching in these spaces? This book is intended for faculty preparing to teach in or already working in this new classroom environment; for administrators planning to create ALCs or experimenting with provisionally designed rooms; and for faculty developers helping teachers transition to using these new spaces.
